### Regional AAC Consultants:

If you wish to speak to your Regional AAC Consultant, please call +44 (0)1733 370 470 (Option 3)

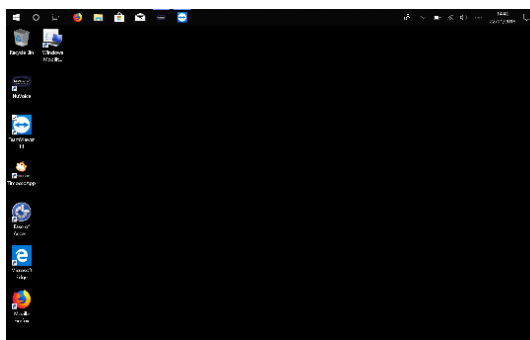

The **Accent** is a Communication Aid but also has computer capabilities. If you wish to have Internet access you must firstly make sure you have a wireless internet connection. If you haven't, you will need to call your internet service provider for more information.

### Wi-Fi For a Wireless Connection

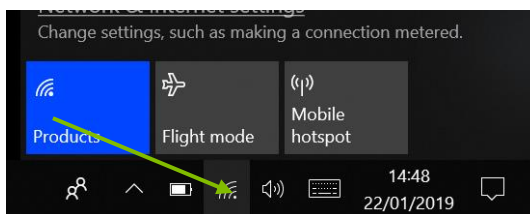

For a wireless internet connection, you must connect to a Wireless local area network (**WLAN**).

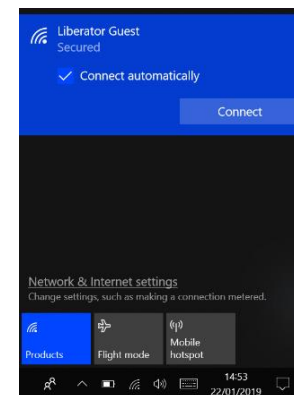

1. Select the **TOOLS** button.
2. Select the **HIDE/SHOW WINDOWS** key from the side **off-screen** buttons.
3. The Accent Windows desktop will be displayed.

4. The Wi-Fi icon should be displayed in the upper right side of the task bar. It should have an asterisk beside it, indicating it is available but not connected.

5. Tap on the Wi-Fi icon.
6. A list of available networks to connect to, and their signal strength, will be displayed. If you are at home your home network should be visible. If you are at school or work, you will probably see more networks to choose from.
7. Tap the network you want to connect to.

8. Tap **CONNECT**.
9. Follow the directions on your display. You may have to enter a network key or password.  
*When you are connected, the Wi-Fi icon in the task bar changes to bright white.*
10. Exit the menu and go to the Internet to test the connection. Select either the Firefox icon on the desktop or the Microsoft Edge icon and go to a desired website.

**NB:** Please remember that Liberator is not responsible for the set-up of Wireless Networks and the above is just a guide. You may need to contact your internet service provider for information on setting up an internet connection.

### What Anti-Virus Software Should I Load On My Accent?

If you intend to use the **Accent's** internal computer, we can confirm that the Microsoft anti-virus software **WINDOWS DEFENDER** is installed and activated and will not impact the device's performance.

If you decide to load different anti-virus software, you will want to choose one with caution and select one that uses minimal resources. Always review the **System Requirements** before loading. Certain **Anti-Virus Software** will make the device run slowly due to scanning and updates being done in the background. Liberator cannot be held responsible for any adverse effects of 3<sup>rd</sup> party software.
