

NOVACHAT – Transfer Vocabulary Files To & From a USB Stick

Important Functions

Below are the main Functions buttons on the NOVA chat devices:

Menu Button  /  /  allows you to determine which vocabulary file will be used, which augmentative options are enabled, how and when to speak messages, and how a wide variety of other options are configured.

Home Button  /  /  navigates out of Chat software to the Home screen of the Android software.

Back Button  /  /  navigates to previous page or to previous Menu. Pressing and holding the Back button also reveals the Chat software menu.

 Click [HERE](#) to download the Chat Editor Software.

You may backup to and from a USB stick if your device is **running v2.15 software and above**. This is true for all NOVA chat and ChatFusion devices, with the exception of NOVA chats with serial numbers starting 5NC, 7NC, 10NC, 10XNC which are not compatible with USB transfers.

You will require a USB Multi-Stick with either a micro-USB or USB-C connector.

The USB Stick provided by Salttillo has either a micro-USB or USB-C connector on one end that plugs into your device and a USB 3.0 connector on the other end that plugs into a computer.

Transferring Vocabulary Files

1. Connect the USB drive to the USB port on your device.

Note: If the device's file manager opens, use the device's Back button to close it.

2. On the device, select **Menu > Library**.
3. Select **Menu > Import/Export**.

4. In the Android screen select **Menu > USB DISK**.

5. Select the LOST.DIR folder then press the **USE THIS FOLDER** button at the bottom of the screen.

A window will list the customized files under **Device** on the left. Any files already on the USB drive are listed under **Backup Folder** on the right.

2. Select **To Device**, which is now highlighted. The file(s) will be copied to the device. When the files finish copying, they will be listed under **Device**.

3. When you have finished transferring files, disconnect the USB stick from your device and store it in a safe location and/or copy the files from the USB drive to a computer for safe keeping.

USB Transfer – Known Errors

If you are importing a file that contains an imported image, and that same imported image also exists on two files on the device, the transfer will error out.

To transfer files from your device to the USB drive:

1. Select each file on the device that you want to copy to the USB drive.
2. Select **To Backup**, which is now highlighted. The files will be copied to the USB drive. When the files finish copying, they will be listed under **Backup Folder**.

3. Your backed-up files are displayed in the **Backup Folder**.

To transfer files from the USB drive to your device:

1. Select each file on the USB stick that you want to copy to the device.
